Subject: Microsoft Settlement

Is Microsoft a monopoly? Not in the proper, derogatory, traditional sense of the term. Unlike the old AT&T Bell monopoly, or today's U.S Post Office monopoly, Microsoft did not gain its market share by having the government outlaw its competitors: Microsoft earned its position in the free-market.

Give businessmen a break. It is the only way our country will progress. Why don't you attack the trial lawyers with the vigor you attack business?
